VIOLATIONS

- **DOC 350.18 Security**: The jail shall have a system providing for well-being checks of inmates. Policies and procedures shall provide that all inmates are personally observed by jail security staff at staggered intervals not to exceed the following: (a) 60 minutes (b) 15 minutes for inmates housed on suicide watch. Observation logs reviewed found areas where the timeframe is past the maximum timeframe allowed between checks.

- **DOC 350.13(5) Inmate Health Screening:** A health appraisal that is to be completed within 14 days after arrival at the facility unless a health appraisal has been completed by health care staff within the previous 90 days. The health appraisal shall be completed by health care staff in accordance with protocols established by the responsible physician. A spot check of records verified general compliance; however, not all appraisals were completed within the 14 day allotted time frame.

- **DOC 350.14(4) Inmate Health Care:** Medical records shall be kept separate from other records and shall be maintained in a confidential manner in accordance with State Statutes 146.81 to 146.83. During the inspection, inmate medical records were found in the inmate files which were kept in an unsecured drawer in the booking room.

- **DOC 350.24 (2b-g) Discipline:** A staff member who observes an inmate committing a minor violation shall inform the inmate of the rule that he or she has violated, the potential discipline, and the disciplinary procedures for minor violations under pars. (c) to (g). The staff member shall give the inmate an opportunity to make a verbal statement about the alleged violation to the staff member. The staff member may impose a minor discipline if he or she finds that a violation occurred. The staff member shall inform his or her supervisor of the incident and the discipline administered as soon as the supervisor is available. The supervisor shall review the incident and discipline administered. If the supervisor concludes that the violation constitutes a major violation, the alleged infraction shall be handled in accordance with sub. (3). If the supervisor finds that no violation has occurred, the inmate shall be notified that the charge has been dismissed. The inmate may appeal the supervisor's decision. The jail shall have a procedure for an inmate to follow if the inmate wishes to appeal that decision. The inmate shall be notified of his or her right to appeal the supervisor's decision and of the jail's procedure for making the appeal. Information about the incident, the discipline administered, and the supervisor's decision shall be made part of the inmate's file. If the supervisor finds that no violation occurred or if the reviewer of an appeal submitted under par. (f) finds that no violation occurred, the due process records shall reflect those findings.

  During the inspection, one minor violation report was reviewed. This report was written in Word format and did not contain the required information as noted in 350.24. Per the Iron County Sheriff's Department's Policy #52, Section 2 C(3): The jail officer imposing discipline will document the incident on a Jail Incident Report, including the specific nature of the offense and the action taken. A spot check of records revealed that staff are not utilizing a Jail Incident Report Form and are not documenting the action taken in reference to the discipline of inmates for minor violations of jail rules.

MISCELLANEOUS

- Staff has not received annual strip search training as required per WI State Statute 968.255(6).

APPROVAL

The Iron County Jail is approved by the Department of Corrections for the secure detention of adult offenders with the maximum capacity of 36. This approval is contingent on the correction of the violations noted above and continued compliance with all applicable state statutes and administrative codes.

As discussed with the jail administrator at the time of this inspection, a best practice would be to design and implement a form that would document inmate discipline, waivers, hearings, etc. It should be noted that this same recommendation was made during the 2016 inspection.
