Introduction

The Wisconsin prison population has grown substantially over the last 30 years, more than tripling from 1990 to 2019. To present a complete picture of how the prison population has changed, admissions to prison, point-in-time prison population counts, and releases from prison are included in this report series. All three types of data are important to consider when examining changes in the prison population. For example, an increase in the number of releases in one year may be associated with a similar increase in the number of admissions several years prior, or an increase in the overall prison population may be related to an increase in admissions and a simultaneous decrease in releases. While there are many other factors that likely contribute to these changes, examining multiple facets of the prison population is a valuable method for tracking and anticipating changes in the number and types of people that the Wisconsin Department of Corrections (WI DOC) is and will be responsible for. Tracking various aspects of the prison population allows the WI DOC to make appropriate adjustments to its facilities and policies as needed.

The data presented in this report have been rigorously validated to ensure accuracy. This data can also be found in the [DAI Point-in-Time Interactive Dashboard](#) on the Data and Research, Interactive Dashboards page of the WI DOC public website.

Prison Facilities

There are 37 correctional institutions and centers throughout the state of Wisconsin. The Division of Adult Institutions (DAI) oversees 19 adult correctional facilities and is responsible for the administration of the Wisconsin Correctional Center System (WCCS), which encompasses 16 Correctional Centers. Additionally, this report includes data regarding persons in our care at the Wisconsin Resource Center (WRC), which is administered by the Wisconsin Department of Health Services (DHS) in partnership with WI DOC. WRC is a specialized inpatient mental health facility established as a prison under Wisconsin Statute [s. 46.056](#).

WI DOC uses three security levels for its institutions: maximum, medium, and minimum. Facilities at these three security levels vary by design and features, including physical plant design, level of staffing, and operating procedures. A maximum security facility has the most restrictive level of confinement, while a minimum security facility has the least restrictive, and all security levels offer a wide variety of treatment, education, and work programs. Relatedly, there are four different custody levels assigned to individuals in our care: maximum, medium, minimum, and minimum community. These individual custody levels are determined by a classification system that evaluates people in our care by established criteria. An individual's custody level may be different than the security level of the facility in which they are housed. However, except for those awaiting transfers and in situations where there is a declared emergency or disturbance at an institution, an individual's custody classification shall be no greater than the designated security classification of the institution in which the person in our care is placed.

Maximum Security facilities have the highest level of security. These facilities may have features that include, but are not limited to, fortified walls, double restrictive fencing, lethal stun fencing, towers, and perimeter vehicle patrols. Housing mostly consists of multiple and single occupant cells. It has the highest staff-to-person-in-our-care ratio, and movement of those in our care is closely supervised. Cell opening and closing is controlled by security staff. These facilities can house individuals of all security levels.

Medium Security facilities have perimeter fencing, motor vehicle patrol, and possibly towers. Housing mostly consists of multiple occupant cells along with secure barracks units, and each housing unit is locked at night. Most individuals in our care are able to open and close their own cells, while some are controlled by staff. Security staff provide direct supervision over the persons in our care and sleeping areas. Movement of those in our care is less restrictive than in a maximum security prison.

Minimum Security facilities have the least restrictive level of security. Currently, three facilities have single perimeter fencing, while the rest do not have fencing. They do not have towers and most do not have motor vehicle patrols. Housing consists of single, double, and multiple occupant cells along with secure barracks units. Minimum custody individuals in our care at minimum security prisons often have job placements with civilian employers (minimum community custody) or participate in community-based work assignments. There is more freedom in the movement of the persons in our care within these prisons and these individuals may have more privileges and responsibilities than they would at a medium or maximum security facility.

Prison and Correctional Center Characteristics

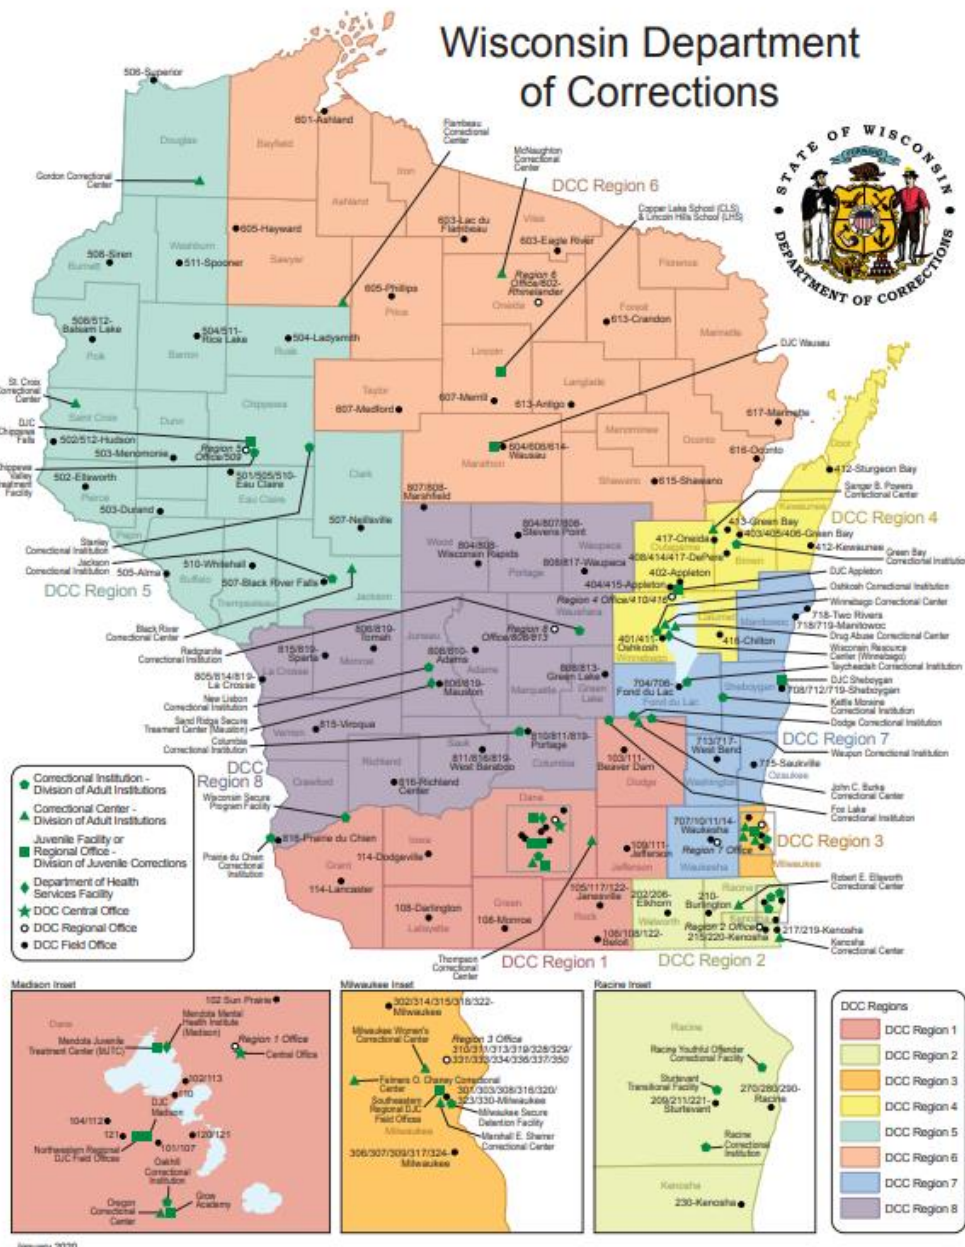

Adult Institutions	Year Opened	Security Level	Operating Capacity	12/31/2019 Prison Population
Chippewa Valley Correctional Treatment Facility	2004	Minimum	508	496
Columbia Correctional Institution	1986	Maximum	845	805
Dodge Correctional Institution	1978	Maximum	1,684	1,651
Fox Lake Correctional Institution	1962	Medium	1,366	1,361
Green Bay Correctional Institution	1898	Maximum	1,101	1,063
Jackson Correctional Institution	1996	Medium	1,012	988
Kettle Moraine Correctional Institution	1962	Medium	1,187	1,182
Milwaukee Secure Detention Facility	2001	Medium	998	754
New Lisbon Correctional Institution	2004	Medium	1,052	1,045
Oakhill Correctional Institution	1976	Minimum	765	754
Oshkosh Correctional Institution	1986	Medium	2,080	2,024
Prairie du Chien Correctional Institution	1997	Medium	522	511
Racine Correctional Institution	1991	Medium	1,703	1,674
Racine Youthful Offender Correctional Facility	1998	Medium	460	459
Redgranite Correctional Institution	2001	Medium	1,028	1,013
Stanley Correctional Institution	2003	Medium	1,595	1,580
Sturtevant Transitional Facility	2003	Minimum	152	148
Waupun Correctional Institution	1851	Maximum	1,265	1,239
Wisconsin Secure Program Facility	1999	Maximum	485	485
Wisconsin Resource Center ¹	1983	Maximum	344	421

Wisconsin Correctional Center System	Year Opened	Security Level	Operating Capacity	12/31/2019 Prison Population
Black River Correctional Center	1962	Minimum	138	137
Drug Abuse Correctional Center	1977	Minimum	294	282
Felmers O. Chaney Correctional Center	2000	Minimum	110	107
Flambeau Correctional Center	1954	Minimum	101	81
Gordon Correctional Center	1950	Minimum	93	87

Milwaukee Women's Correctional Center	2003	Minimum	100	107
Robert E. Ellsworth Correctional Center	1989	Minimum	324	478
Taycheedah Correctional Institution	1921	Maximum	773	890

WISCONSIN PRISON POPULATIONS

Information presented in this report represents point-in-time prison populations over the last 20 years. While point-in-time “snapshots” of the prison population have been taken twice each year from 1990 to 2019 (on June 30th and December 31st), the majority of this report focuses on the snapshots taken between 2000 and 2019. This report does not include individuals under the supervision of the Division of Community Corrections who are held in a Division of Adult Institutions facility as a temporary hold. See the [Prison Admissions: 2000-2019 report](#), Appendix C, in the WI DOC Data Trend series for information on temporary holds in WI DOC facilities.

Note: Point-in-time numbers exclude temporary holds.

Point-in-Time Prison Populations (June 1990 - December 2019): The graph above displays point-in-time “snapshots” of the prison population from June 1990 to December 2019. The table below documents changes in end-of-year snapshots by gender between 2000 and 2019. The remainder of this report focuses on the population since 2000.

	2000	% Change 2000-2009	2009	% Change 2009-2019	2019
Male	19,022	+11.7%	21,249	+4.3%	22,165
Female	1,343	-5.4%	1,271	+20.1%	1,527
Total Population	20,365	+10.6%	22,520	+5.2%	23,692

See Appendix B, [Table 1](#), for a complete table of point-in-time numbers, and [Table 2](#) for a complete table of point-in-time numbers by gender.

2019 End-of-Year Snapshot

- 38 was the average age
- 93.6% were male
- 42.0% were Black and 52.4% were White
- 7.9% reported Hispanic or Latino ethnicity
- 45.8% of men and 47.6% of women reported having dependent children
- 5.8% reported having military experience
- 38.6% of men and 86.7% of women had a mental health condition
- 67.8% had a violent crime as their most serious offense
- 28.7% had five or more years left to serve in prison

Populations by Race

Since 2000, White persons in our care have made up the largest proportion of the prison population at every point-in-time. Between December of 2000 and 2015, the proportion of White persons in our care increased by 9.8%, while the proportion of Black persons in our care decreased by 12.2%. Since then, the trends for both groups have switched, with the proportion of White persons in our care decreasing by 3.0% and the proportion of Black persons in our care increasing by 2.2%.

Note: Point-in-time numbers exclude temporary holds.

Point-in-Time Population by Gender, Race, and Ethnicity in December 2000 and 2019

	Male		Female	
	2000	2019	2000	2019
Race				
White	49.2%	51.3%	48.9%	69.0%
Black	46.8%	43.4%	46.9%	22.1%
American Indian/ Alaskan Native	3.2%	4.1%	3.6%	7.9%
Asian/Pacific Islander	0.8%	1.2%	0.4%	1.1%
Did Not Report	0.1%	0.1%	0.1%	0.0%
Ethnicity*				
Hispanic or Latino	7.9%	8.2%	5.4%	3.0%

* Persons in our care in all race categories can identify themselves as Hispanic or Latino.

Among men, the proportion of White and Hispanic persons in our care has **increased**, while the proportion of Black persons in our care has **decreased**.

Among women, the proportion of White and American Indian/Alaskan Native persons in our care has **sharply increased**, while the proportion of Black and Hispanic persons in our care has **sharply decreased**.

See Appendix B, [Table 3](#), for a complete table of point-in-time numbers by race, and [Table 4](#) for a complete table of point-in-time numbers by ethnicity.

Populations by Age

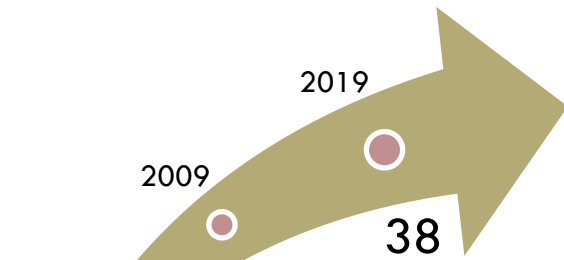

From December of 2000 to 2019, the proportion of all persons in WI DOC prisons aged 45 or older increased by 129.7% (from 12.8% to 29.4%). During that same time, the proportion of those aged 24 or younger decreased by 57.5% (from 25.4% to 10.8%).

See Appendix B, [Table 5](#), for a complete table of point-in-time numbers by age.

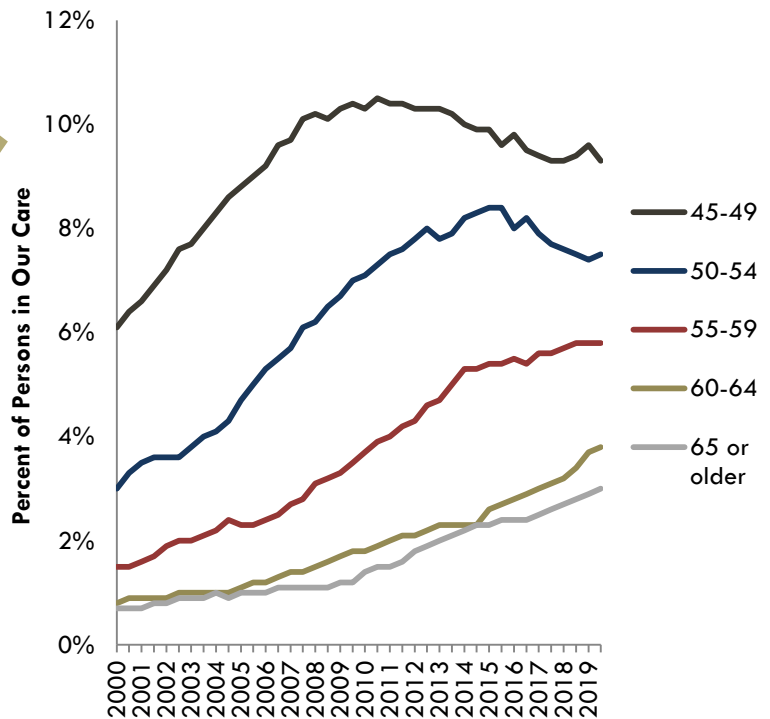

Note: Point-in-time numbers exclude temporary holds.

Average Age of Persons in Our Care: End-of-Year Populations

As the proportion of younger persons in our care has declined and the proportion of older persons in our care has increased, the average age of the overall prison population has steadily increased.

Point-in-Time Populations by Age (45 or older)

Note: Point-in-time numbers exclude temporary holds.

Populations by Most Serious Offense

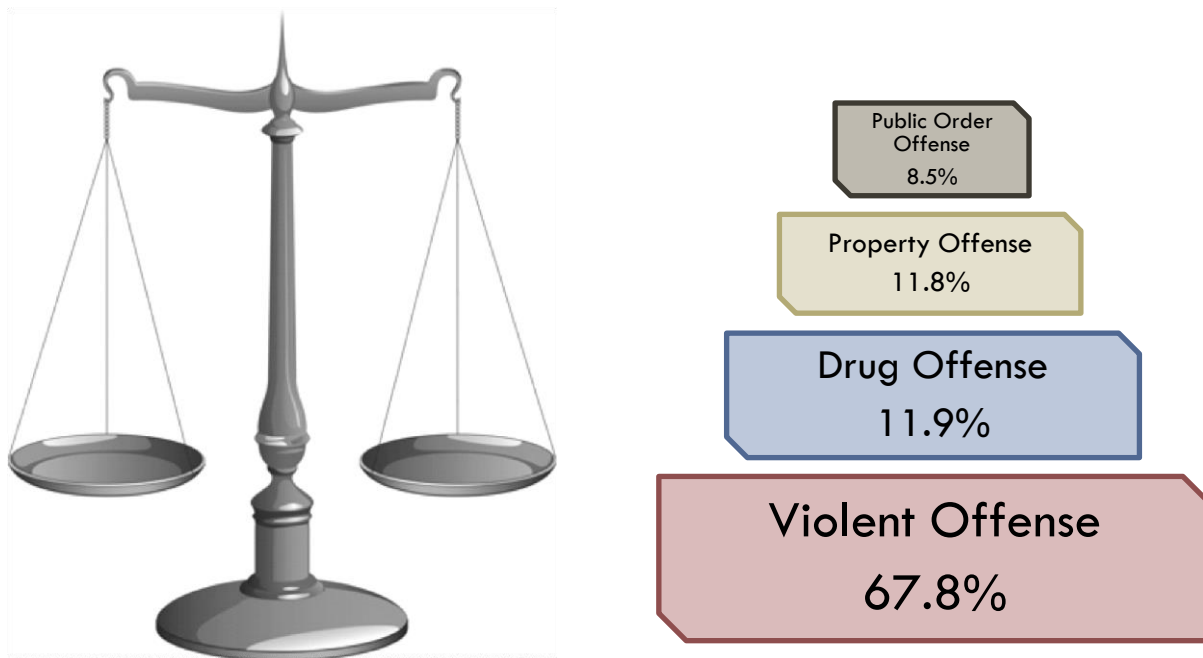

Offenses committed by persons in the care of the WI DOC were separated into four offense categories: violent offenses, property offenses, drug offenses, and public order offenses. Offense categories were based on the Association of State Correctional Administrators' (ASCA) Performance-Based Measures System standards. Many individuals were convicted of multiple offenses; for this reason, a person's most serious offense was selected for this analysis.

See Appendix B, [Table 6](#), for a complete table of point-in-time numbers by most serious offense.

Note: Point-in-time numbers exclude temporary holds and persons in our care without offense data.

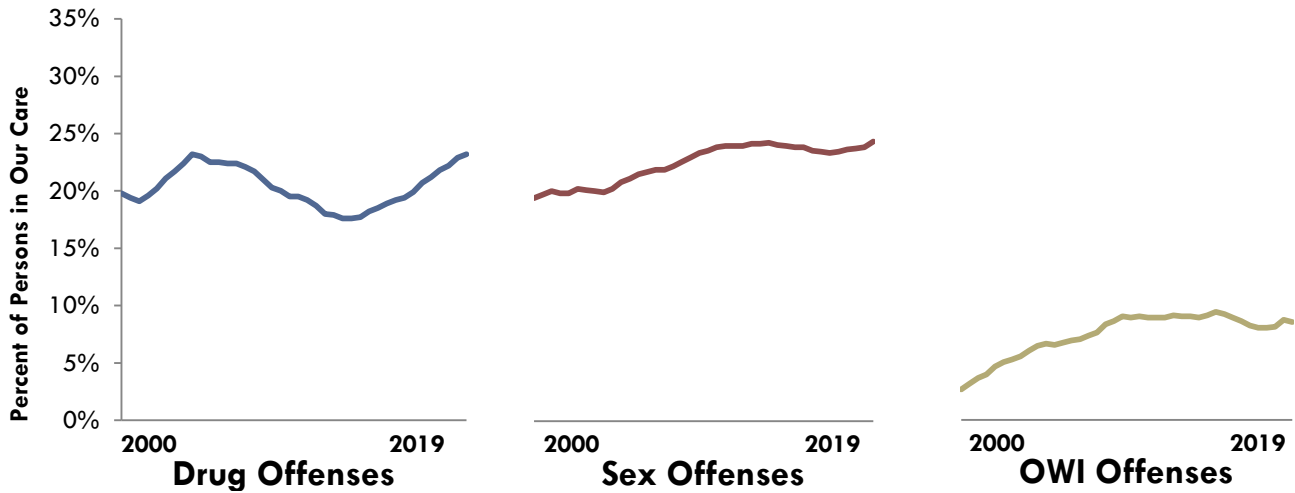

Point-in-Time Population by Most Serious Offense (December 2019)

Populations with Any Drug, Sex, or Operating While Intoxicated Offense

In the graphs below, persons in our care were included in one or more of the three offense categories if any of their active offenses at the point-in-time snapshot were a drug, sex, or operating while intoxicated (OWI) offense. For example, a person was counted in each of the three categories if they had an active drug offense, sex offense, and OWI offense at the point-in-time snapshot. The category that an individual was included in does not necessarily indicate their most serious offense.

See Appendix B, [Table Z](#), for a complete table of point-in-time numbers by drug, sex, or OWI Offense.

Note: Point-in-time numbers exclude temporary holds and persons in our care without offense data.

Drug Offenses

- The percentage of persons in our care with a drug offense reached 23.0% in 2004, decreased to 17.6% in 2012, and then increased again to a high of 23.2% in 2019.

Sex Offenses

- The percentage of persons in our care with a sex offense has increased from 20.1% in 2000 to 24.8% in 2019.

OWI Offenses

- The percentage of persons in our care with an OWI offense increased substantially from 3.2% in 2000 to 8.6% in 2019, with a peak of 9.3% in 2015.

Populations by Estimated Time Left to Serve

Time left to serve was calculated as the time between the specific point-in-time date and projected end date of a person’s incarceration portion of their sentence. While time left to serve does not represent the overall sentence a person in our care *must* serve in prison, it offers one possible explanation for changes in the prison population over time - such as why the prison population has gotten older.

See Appendix B, [Table 8](#), for a complete table of point-in-time numbers by estimated time left to serve.

Note: Point-in-time numbers exclude temporary holds and persons in our care without offense data.

- From 2000 to 2019, the proportion of persons in our care with **less than five** years left to serve **decreased by 8.1%**.
- During that same time, the proportion of persons in our care with **five or more** years left to serve, excluding life sentences, **increased by 22.6%**.

Persons in Our Care Serving Life Sentences: December 2000, 2009, and 2019

Since December of 2000, the number of individuals in WI DOC prisons serving life sentences has increased by 29.1%. The proportion of those serving a life sentence has increased from 4.6% to 5.3% of the WI DOC prison population. The average age of lifers has increased by 11 years since 2000.

Appendix A: Methodology

Point-in-Time Prison Populations

The point-in-time prison population data presented in this report include individuals who were physically present in a WI DOC prison. It also includes individuals occupying contract beds in county jails, mental health facilities, and prisons in other states, as well as those who were not physically in a WI DOC facility on that point-in-time date but who had a bed held for them while they were out to court or at the hospital. Additionally, it includes interstate compact individuals serving other states' sentences or federal sentences in WI DOC facilities. These population counts do NOT include interstate compact individuals who were serving WI sentences but were physically incarcerated in other states' prisons or federal facilities. Furthermore, persons in our care with adult convictions who were being housed in a juvenile facility were excluded from this report.

Point-in-Time Prison Populations by Most Serious Offense

Offense categories were based on the Association of State Correctional Administrators' (ASCA) Performance-Based Measures System standards. While the ASCA standards were followed as closely as possible in the categorization of offenses, supplementary rules were developed to aid in categorizing statutes that did not clearly fit into one category or another. Offense categorization methodology is available upon request.

Offenses committed by persons in the care of the WI DOC were separated into four offense categories: violent offenses, property offenses, drug offenses, and public order offenses. Offenses included in this report represented an individual's most serious offense. The most serious offense was selected based on the order of the categories listed above, with violent offenses as the most serious and public order offenses as the least serious.

Over the years, statutes have been passed that have contributed to the changing composition of the WI DOC prison population. For example, in 2009, Wisconsin Act 100 made an operating while intoxicated (OWI) offense a misdemeanor if it occurred with a minor child (under the age of 16) in the vehicle; it also required the installation of an ignition interlock device for all repeat offenders and for first-time offenders with a blood-alcohol level of more than 0.15. Then in 2015, Wisconsin Act 371 was signed into law, increasing the penalty for a fourth OWI conviction to a felony in all circumstances. OWI offenses fall under the Public Order Offense category, and the statute changes described above likely contributed to some of the changes in point-in-time prison population counts over the years.

For the most serious offense analysis, persons in our care were not counted if they did not have an active offense. Occasionally, a person appeared to not have any active offenses at a particular point-in-time date due to data entry lag, and/or due to the logic used to accurately align offenses with specific points in time. Although the offense exists in the WI DOC data system, those offenses were not included here. The most serious offense analysis also excluded individuals in prison at any of the points in time for Alternatives to Revocation (ATR), erroneous admissions, pending revocation hearings, and for interstate compact individuals (with no Wisconsin sentences); these individuals were not serving time in prison for the confinement portion of Wisconsin sentences.

Point-in-Time Prison Populations with Any Drug, Sex, or OWI Offense

A person in our care was included in one or more of these three offense categories if any of their active offenses at the point-in-time were a drug, sex, or OWI offense. This means that a person could have been counted in each of the three categories if they had an active drug offense, sex offense, and OWI offense on the point-in-time date. The category that an individual was included in does not necessarily indicate their most serious offense. Persons in our care were not counted in the population if they did not have an active offense.

Point-in-Time Prison Populations by Estimated Time Left to Serve

For the time left to serve analysis, time left to serve was calculated as the time between each point-in-time date and the projected end date of an individual's incarceration portion of their sentence. Persons in our care were excluded if they did not have a projected end date for their period of incarceration or if they did not have an active offense. A person's end date reflected their Mandatory Release/Extended Supervision release date, which is the date the individual should be released from prison to begin the supervision portion of their sentence. If a valid Mandatory Release/Extended Supervision release date was not recorded, the person's Maximum Discharge date was used to determine their projected release from prison. Note that some historical estimated confinement times in this report may not match the historical confinement times from previous reports due to changes in analytical methodology. Prior to the *Prison Admissions: 2000 – 2019* report, an individual's end date could reflect their actual release date if they had released prior to when the data was run for the report. However, actual release dates are not known at the point-in-time date, and to better reflect the information that was true at the point in time, release dates were removed from end date calculations.

Due to timing of data entry, some persons in our care did not have a valid Mandatory Release/Extended Supervision date or Maximum Discharge date associated with a particular point-in-time date. This does not mean that they did not have one of those dates recorded in the data system; rather, the appropriate date that should have been associated with that point-in-time date could not be identified. If a valid Mandatory Release/Extended Supervision date and Maximum Discharge date could not be identified, the individual was removed from that point-in-time for the time left to serve analyses. Additionally, the time left to serve analysis excluded persons in prison for ATRs, erroneous admissions, pending revocation hearings, and interstate compact individuals without Wisconsin sentences (as they were not serving time in prison for the confinement portion of Wisconsin sentences).

Appendix B: Tables

Table 1. Total Point-in-Time Prison Populations

Point-in-Time	Total Population	Point-in-Time	Total Population
06/30/1990	6,949	06/30/2005	22,127
12/31/1990	7,328	12/31/2005	22,198
