Offender Monitoring Population

As of June 30, 2017

The DOC Electronic Monitoring Center provides centralized electronic monitoring services for offenders as an alternative to incarceration.

*Some of the older alcohol monitoring devices are being phased out and replaced by the newer Soberlink alcohol monitoring technology. Soberlink Cellular Devices use facial recognition technology to confirm the identity of the offender in each breath test and results are submitted real-time.

New Probation Case Count by Offender

The total count of offenders with probation cases that were ordered in fiscal year 2017 was 23,701. Of these, 19,684 offenders started new episodes of supervision with DCC. Of these, 10,689 offenders were new intakes to DOC.

Offender Risk Level and Criminogenic Needs

The offender risk level represents a calculated likelihood of the risk to re-offend and is used, in part, to determine how closely offenders are supervised.

Criminogenic needs are attributes of offenders that are directly linked to criminal behavior. Effective correctional treatment targets these dynamic criminogenic needs through interventions and case plans.

The following graphs show 21,059 total offenders on supervision who completed an intake assessment* between July 1, 2016, and June 30, 2017.

*COMPAS, a research-based risk assessment tool, is used to identify offenders' risk level and criminogenic needs.
