DEFINITIONS, ACRONYMS, AND FORMS

Correctional Offender Management Profiling for Alternative Sanctions (COMPAS) – An actuarial assessment tool which has been validated on a national norming population. It predicts the general likelihood that those with a similar history of offending are either less likely or more likely to commit another crime generally within the two year period following release from custody. The COMPAS assessment does not attempt to predict specifically the likelihood that an offender shall commit a certain type of offense within the same two year period, nor does it designate external classification inmate custody. In addition to identifying general levels of risk to re-offend, COMPAS also identifies criminogenic needs specific to that inmate which are most likely to affect future criminal behavior.
