

# Northpointe Suite

## Automated Decision Support

The Northpointe Suite is an automated decision-support software package of industry leading risk, needs assessment and case management tools. The instruments address the complex set of risk, need and case management considerations that improve decision accuracy in custody, supervision and programming based on underlying criminogenic needs.

The Northpointe Suite is an integrated web-based assessment and case management system for criminal justice practitioners who must make decisions regarding community placement, supervision, treatment and case-management of offenders. The Northpointe solution is used in pretrial, probation, institutions, parole and community corrections across the country.

Risk/Needs and Case Planning is designed for both adult and youth offenders recently removed from the community or currently in the community.

## Northpointe Suite Modules

### COMPAS Core

COMPAS Core Risk/Needs and Case Planning is designed for both male and female offenders recently removed from the community or currently in the community e.g. jail, probation, community corrections, etc. COMPAS Core takes a “retrospective” look at risk and needs factors for placing and supervising the offender in the community.

### COMPAS Reentry

COMPAS Reentry Risk/Needs and Case Planning provides a state-of-the-art risk and needs assessment tool for the Reentry population who has been incarcerated for more than 18 months. COMPAS Reentry takes a “prospective” look at both the male and female populations in assessing the risks and needs of offenders preparing to leave incarceration and transition back into the community.

“The Northpointe Suite offers the LSI-R, LSI-R:SV and LSI-CMI assessment tools for those agencies that utilize the Multi-Health assessments in their daily practice. These assessment instruments are integrated with the Suite Case Plan for seamless development of case-specific plans, ongoing supervision case management and ad-hoc report creation.

## COMPAS - WRNA (Women)

COMPAS Women, used in conjunction with gender neutral Core and Reentry scales, is a complete set of Gender-sensitive scales that is integrated into the suite. A full range of "gender-specific" factors (sexual abuse as a child, self-efficacy, quality of relationships, self-esteem, etc.) are embedded in the assessment and can be used to refine and guide treatment planning for women offenders.

## COMPAS Youth

COMPAS Youth Risk/Needs and Case Planning, designed for delinquent youth ages 12 to 17, takes advantage of recent research on the predictors and needs factors most strongly linked to juvenile delinquent behavior. It also incorporates the "strengths perspective" and contains many critical factors that may protect the high-risk youth from serious delinquency.

## COMPAS Classification

Northpointe's nationally recognized "Decision Tree" Objective Jail Inmate Classification System is validated, court tested and reliable. Northpointe's Decision Tree classification, taught at the National Institute of Corrections, meets all accepted principals and guidelines of objective classification methods.

## Northpointe Suite Case Manager

Northpointe's Case Manager is a comprehensive, dynamic software solution managing all aspects of community offender processing and supervision case management. Case Manager includes critical functionality for Pre-Sentence Investigation, Specialty Court supervision and a comprehensive Workload Manager to oversee supervision agency operations.

## Northpointe Suite Pretrial

Designed specifically for pretrial release programs, Pretrial tracks conditions of release, case processing events, supervision levels, contacts, court information, next court dates, court date attendance, drug testing, program information, case notes and outcomes tracking. The Failure to Appear Risk Scale also calculates a "Recommended Supervision Level" if placed in the community.

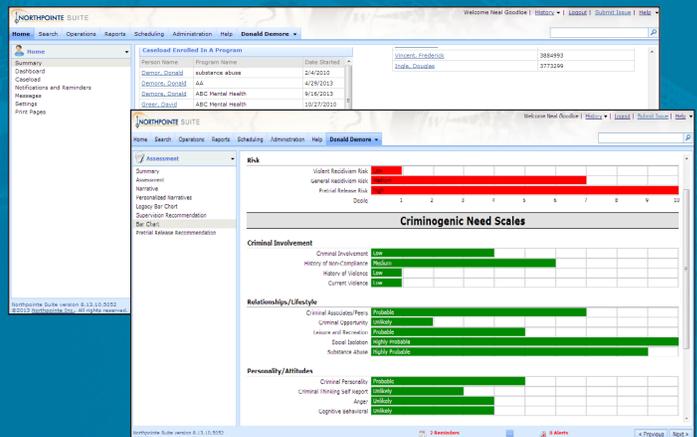

## Northpointe Suite Ad-hoc Reports

The Northpointe Suite offers a seamless, integrated, and easy to use Ad-hoc Report generation tool allowing for the custom creation of an unlimited number of roster reports, statistical tabulations and charts. The Northpointe Ad-hoc Reports module gives line staff, managers and administrators easy access to all of the data fields in the system.

# The most scientifically advanced risk and needs assessments

Take a "retrospective" look at risk and needs factors over the previous 12 months for making treatment and supervision decisions at intake and in the community or a "prospective" look at risk and needs for longer term incarcerated inmates transitioning back into the community.

- Criminogenic needs scales
- Support development and execution of treatment decisions
- Review historical assessment results and prior case plan activity and outcomes

## About equivant

We are driven by a justice system that instills confidence through its processes and is accessible to all citizens. Like you, equivant aims to embrace community while advancing justice and deliver better outcomes to all who touch the justice system. We do this through our deep domain knowledge, modern technologies, and expert services that help promote public and individual safety by informing decisions at every step. As fellow stewards of justice, equivant is committed to your mission and we value your ideals. Our people operate with fairness and integrity, believing that there is no such thing as "good enough".
