DEPARTMENT OF ADULT INSTITUTIONS  
OFFICE OF PROGRAM SERVICES

**JUNE 2025**

# **WISCONSIN DEPARTMENT OF CORRECTIONS FACILITIES**

## **MAXIMUM INSTITUTIONS**

- Columbia Correctional Institution (CCI)
- Dodge Correctional Institution (DCI)
- Green Bay Correctional Institution (GBCI)
- Waupun Correctional Institution (WCI)
- Wisconsin Secure Program Facility (WSPF)

## **MEDIUM INSTITUTIONS**

- Fox Lake Correctional Institution (FLCI)
- Jackson Correctional Institution (JCI)
- Kettle Moraine Correctional Institution (KMCI)
- Milwaukee Secure Detention Facility (MSDF)
- New Lisbon Correctional Institution (NLCI)
- Racine Correctional Institution (RCI)
- Racine Youthful Offender Correctional Facility (RYOCF)
- Redgranite Correctional Institution (RGCI)
- Stanley Correctional Institution (SCI)
- Oshkosh Correctional Institution (OSCI)

## **MINIMUM INSTITUTIONS**

- Chippewa Valley Correctional Treatment Facility (CVCTF)
- Oakhill Correctional Institution (OCI)
- Prairie du Chien Correctional Institution (PDCI)
- Sturtevant Transitional Facility (STF)

## **WISCONSIN CORRECTIONAL CENTER SYSTEM (WCCS)**

- Black River Correctional Center (BRCC)
- Drug Abuse Correctional Center (DACC)
- Felmers O. Chaney Correctional Center (FCCC)
- Flambeau Correctional Center (FCC)
- Gordon Correctional Center (GCC)
- John C. Burke Correctional Center (JBCC)
- Kenosha Correctional Center (KCC)
- Marshall Sherrer Correctional Center (MSCC)
- McNaughton Correctional Center (MCC)
- Oregon Correctional Center (OCC)
- St. Croix Correctional Center (SCCC)
- Sanger Powers Correctional Center (SPCC)
- Thompson Correctional Center (TCC)
- Winnebago Correctional Center (WCC)

## **WISCONSIN WOMEN'S CORRECTIONAL SYSTEM (WWCS)**

- Taycheedah Correctional Institution (TCI)
- Milwaukee Women's Correctional Center (MWCC)
- Robert E. Ellsworth Correctional Center (REECC)

## PRIMARY TREATMENT SERVICES

---

As part of the Department of Corrections Mission Statement to provide opportunities for change and success, the Division of Adult Institutions provides programming opportunities to persons in our care (PIOC) that will further enhance reentry efforts and successful reintegration into the community. Criminogenic needs identify major risk factors associated with criminal conduct. When a COMPAS Assessment and other screening tools are completed, a risk level and a list of needs are identified for each person. All of these are connected with recidivism and can be targeted for change. Through the use of treatment and programming listed below, these needs can be met to reduce a person's risk for reoffending.

### ANGER MANAGEMENT PROGRAM (AM)

Anger Management is a program designed to address the needs of the participant whose aggressive behaviors tend to be impulsive and reactive rather than instrumental and pre-planned. In addition to concepts such as cognitive restructuring, AM programs teach PIOC cognitive and interpersonal skills to deter and replace violent behaviors. These skills include stress management, impulse control strategies, assertiveness skills, communication skills, identifying personal anger precursors (thoughts and situations that provoke angry reactions), handling criticism and provocation. Lessons are presented by trained staff. Group sessions are generally 90-120 minutes in length, held twice a week. AM is offered in both male and female institutions.

### **COGNITIVE BEHAVIORAL PROGRAM (CBP)**

Cognitive Behavioral Programs (such as Thinking for a Change (T4C), Dialectical Behavior Therapy (DBT), and Moving On, often combine cognitive restructuring theory with cognitive skills theory to help individuals in the justice system take control of their lives by taking control of their thinking. Lessons are facilitated by a variety of trained staff. Group sessions are generally 90 minutes in length and are held 2-3 times a week. In order to successfully complete the program, PIOC must actively participate in groups, satisfactorily complete all practice work assignments, and demonstrate they have acquired specific skills taught in the program. CBP is offered both as a stand-alone program and/or as part of a component of other programs. CBP is offered in both male and female institutions.

### **DOMESTIC VIOLENCE (DV)**

Domestic Violence Programs, (such as ATAM, Duluth Model, and DV-T4C) are designed for male persons in our care who have shown a pattern of abuse/violence to their significant and intimate partners. Curricula are designed to help participants identify thoughts, attitudes, and beliefs that have justified violence and enabled them to be abusive to their partners. Programs aim to teach skills to change an individual's thoughts/beliefs that have led to their abusive behaviors. A major program objective is for the participant to be able to identify alternative beliefs and intervention strategies to end their abusive behaviors as well as learn and demonstrate non-abusive and non-controlling behaviors.

Violence in Relationships is a cognitive behavioral based program for female persons in our care that identifies the different types of domestic abuse and factors in our society that contributes to the problem of domestic violence. This program also covers issues including why victims stay in abusive relationships and the impact of domestic abuse on the family.

DV programs are presented by trained facilitators. Group sessions are approximately 90 minutes in length, and are held one to two times per week.

### **EMPLOYABILITY**

Employability Programs (such as Windows to Work and Cognitive Behavioral Interventions for Employment- Adult) are employment-based correctional programs designed to increase employability and employment of participants. These programs are designed for individuals who are moderate to high need in the area of employment, and target several criminogenic factors, teaching persons in our care to recognize and manage problem scenarios through the rehearsal and implementation of prosocial responses. Employability programming relies on a cognitive-behavioral approach to teach participants strategies for identifying and managing high risk situations related to obtaining and maintaining employment. Heavy emphasis is placed on skill building activities to assist with cognitive, social, emotional, and coping skill development for the work environment. Lessons are presented by trained staff. Group sessions are generally 90 minutes in length, held one, two, or three times a week.

## **SUBSTANCE USE DISORDER (SUD) PROGRAM**

SUD programming addresses risky thinking that could lead to substance use and criminal behavior. The program's mission is to enhance safety in the community by providing a continuum of substance use disorder treatment services. SUD programs are facilitated by certified substance abuse counselors and are overseen by a clinical supervisor.

Both male and female persons in our care are assigned SUD programs in accordance to their identified risk level; low, moderate, or high. The risk levels provide recommended dosage requirements by assigning SUD and Cognitive Based Program components.

- **Male**

**SUD Level 2:** Cognitive Behavioral Interventions for Substance Use Adult (CBI-SUA)

**SUD Level 3:** CBI-SUA and Thinking for a Change (T4C)

**SUD Level 4:** CBI-SUA, T4C, Social Skills, and Epictetus

- **Female**

**SUD Level 2:** Helping Women Recover and Connections

**SUD Level 3:** Helping Women Recover, Connections, Moving On, and Seeking Safety

**SUD Level 4:** Helping Women Recover, Connections, Moving On, Seeking Safety, and DBT Informed Skills Group

## **DUAL DIAGNOSIS**

Dual Diagnosis is a program for individuals diagnosed with both a substance use disorder and with a severe and persistent mental illness. It is offered to both male and female persons in our care with programs lasting between six to nine months.

The male Dual Diagnosis Program, Mental Illness Chemical Abuse (MICA), is located at Oshkosh Correctional Institution, and designed to be therapeutic communities in which program participants work together for their treatment. All participants are actively involved in the community to shape more responsible and appropriate behavior. This program includes psychiatric treatment, therapy groups, psycho-educational groups, individual counseling sessions, pre-release planning, and post-release follow-up. Components of the program include SUD education, mental health education and management, psychotropic medication regimens, cognitive behavioral components, emotion regulation, problem solving, assertiveness training, relaxation techniques, relapse prevention and release planning.

The female Dual Diagnosis Program, Strength, is located at Taycheedah Correctional Institution. The components include multiple gender-responsive curricula that focus on substance use, trauma, violence, and emotion regulation. Examples of the curricula used include Helping Women Recover, Seeking Safety, Moving On, Coping with Feelings, Beyond Violence, Connections, and Picking up the Pieces. Mental health education, psychotropic medication regimens, bi-weekly treatment planning sessions, and monthly individual therapy sessions are also components of the program.

Both Dual Diagnosis Programs are facilitated by a multidisciplinary team to include psychological services staff and social services staff who are certified substance abuse counselors. The programs are overseen by a Clinical Supervisor.

The Wisconsin Resource Center's Successful Treatment and Recovery (STAR) Program is a 6–9 month, dual-diagnosis program offered at the Wisconsin Resource Center for individuals assessed as moderate to high risk and diagnosed with a severe and persistent mental illness (MH-2a). The program integrates mental health and substance use treatment through structured group and individual sessions, with residents participating in 15–30 hours of programming each week. All phases of STAR – Introduction, Core, and Recovery – are based on *A New Direction*, an evidence-based curriculum developed by Hazelden for justice-involved individuals. This curriculum addresses criminal thinking, substance use, co-occurring disorders, social skills, relapse prevention, and reentry planning.

A key goal of the program is helping participants better understand their co-occurring disorders. Through individual sessions and targeted coursework, residents learn how their mental health symptoms and substance use interact. This empowers them to recognize triggers and develop effective coping strategies for long-term recovery. Participants also complete the AWARE group, which supports wellness and recovery planning through education, self-advocacy, and personal responsibility. Additional programming is available based on individual needs and goals. Referrals are made by PSU staff when criteria are met and are submitted to the WRC Admissions Coordinator for review and acceptance. If accepted, BOCM shall initiate a classification action.

### **CHALLENGE INCARCERATION PROGRAM (CIP)**

The Challenge Incarceration Program (CIP) is a statutorily established program that allows judges to sentence non-violent, non-assaultive individuals with substance abuse needs to this full-time intensive program that combines physical fitness with Substance Use Disorder (SUD) treatment. The program was designed to focus on the whole person and encourage mental, emotional, and physical well-being for program participants. Program components are structured around treatment, health, and well-being. Program activities include physical fitness, work assignments designed to give back to the community, individualized educational programming, individualized and group SUD treatment, and military activities to promote self-discipline and self-efficacy. CIP is facilitated by certified substance abuse counselors and overseen by a clinical supervisor. CIP is offered to both male and female persons in our care. CIP for female PIOC is designed to be gender responsive in nature and provides trauma-informed activities that respond to the unique strengths, needs, and challenges faced by women.

### **EARNED RELEASE PROGRAM (ERP)**

The Earned Release Program (ERP) addresses criminal thinking and substance use disorders. Driven by statute similar to CIP, ERP allows judges to sentence non-violent, non-assaultive individuals with substance abuse needs to this full-time, intensive program designed to reduce the incidence of future

criminal behaviors. The program's mission is to enhance safety in the community by providing a continuum of substance use disorder services. All PIOC entering ERP are assigned core programming that address their criminogenic needs, identified by the COMPAS assessment tool. At its core, ERP treatment modules include cognitive-based substance abuse programming, cognitive behavioral-based curriculum, such as National Institute of Corrections' Thinking for a Change for the male population, or Moving on for the female population, which address cognitive restructuring, social skill building, and problem solving. ERP consists of both core and ancillary/supplemental programming to meet dosage recommendations. Community reintegration is a primary focus throughout the program connecting participants with the respective Probation and Parole agents during each program phase. ERP is facilitated by certified substance abuse counselors and overseen by a clinical supervisor. ERP is offered to both male and female persons in our care.

#### **SEX OFFENDER TREATMENT, LOW RISK (SOT-1)**

SOT-1 is a short-term treatment program designed for persons in our care assessed to be a low risk to sexually reoffend. It consists of 9-12 sessions for a total of at least 18 hours of treatment. The treatment covers topics such as recognizing emotions, writing a thinking report, cognitive errors and distortions, healthy relationships, managing dynamic risk factors, consent, healthy sexuality, safe sex, and coping with community supervision. Both written homework assignments and group participation are expected. SOT-1 is facilitated by trained, mental health staff. Successful group completion involves completing homework assignments, participating in group discussions, and recognizing risk factors.

#### **SEX OFFENDER TREATMENT, CHILD PORNOGRAPHY ONLY (SOT-CPO)**

SOT-CPO consists of 60-80 hours of treatment and is designed for persons in our care whose use of child exploitation materials (CSEM) results in convictions for possession of child pornography in the absence of other contact sexual offenses as identified in the assessment process. The group typically lasts 5-6 months and meets once a week. This group treatment focuses on recognizing risk factors and implementing strategies and behaviors to minimize future risk to sexually reoffend. Completion of all required tasks related to a participant's risk factors and development of an offense prevention plan that addresses those factors is required. The group is facilitated by trained mental health staff. SOT-CPO is currently offered to male persons in our care.

#### **SEX OFFENDER TREATMENT, SHORT-TERM INSTITUTIONAL (SOT-2)**

SOT-2 consists of 80-100 hours of treatment and is designed for persons in our care assessed to have an average risk to sexually reoffend. The group typically lasts for 6-12 months and meets once or twice a week. This group treatment focuses on recognizing risk factors and implementing strategies and behaviors to minimize future risk to sexually reoffend. Completion of all required tasks related to a participant's risk factors and development of an offense prevention plan that addresses those factors is required. The group is facilitated by trained mental health staff. SOT-2 is offered to both male and female persons in our care.

- **SOT-2 Adaptive:** This group is a modification of SOT-2 for participants who have cognitive or adaptive deficits or who have a serious mental illness that would make it difficult for them to complete a standard SOT-2 group.
- **SOT-2 LEP:** This adaptation of the SOT-2 treatment is for adult males whose primary language is Spanish or another language and whose English language proficiency is such that it would interfere with completion of an English language group, as identified at the time of evaluation. The group will be conducted in the primary language or facilitated through the use of interpreters.

### **SEX OFFENDER TREATMENT, LONG-TERM INTENSIVE RESIDENTIAL (SOT-4)**

SOT-4 consists of 400 hours of treatment and is designed for persons in our care assessed to have an above average risk to sexually reoffend. The group typically lasts for two years or longer. The program is currently offered at the Oshkosh Correctional Institution (SOTP) and the Racine Correctional Institution (Beacon). Treatment focuses on recognizing risk factors and implementing strategies and behaviors to minimize future risk to sexually reoffend. Participants are expected to complete all tasks associated with managing or reducing their risk factors and develop a re-offense prevention plan.

- **SOT-4 Long-Term Intensive Residential Adaptive:** This group is a modification of SOT-4 for participants who have cognitive or adaptive deficits or who have a serious mental illness that would make it difficult for them to complete a standard SOT-4 group.
- **SOT-4 Long-Term Intensive Residential LEP:** This adaptation of the SOT-4 treatment is for adult males whose primary language is Spanish or another language and whose English language proficiency is such that it would interfere with completion of an English language group, as identified at the time of evaluation. The group will be conducted in the primary language or facilitated through the use of interpreters.

---

## **EDUCATIONAL SERVICES**

---

The Department of Corrections provides persons in our care the opportunities to improve reading, writing, and mathematics skills, learn Career Technical Education skills, life skills, career awareness skills, and obtain a high school equivalency diploma. Post-secondary Career Technical Education programming is offered in conjunction with the Wisconsin Technical College System. Distance learning through correspondence or controlled online classes from several universities and technical colleges are also offered.

### **ADULT BASIC EDUCATION (ABE)**

Most DAI institutions offer Adult Basic Education Instruction. These studies generally include reading, writing, math, and life skills. The type of instruction in these areas will vary depending on the individual teacher and

site. Instruction may include, among other methods, individualized instruction, computer-assisted instruction, peer or community tutor assistance, small group instruction, and regular class instruction.

### **HIGH SCHOOL EQUIVALENCY DIPLOMA PREPARATION**

Most DAI institutions also offer instruction to prepare persons in our care for the High School Equivalency Diploma (HSED). Generally, individuals who are interested with NRS Levels of 3 and above in Reading Comprehension or Math Number Operations on the TABE test are enrolled in HSED preparation.

Instruction is provided in each of the areas which comprise the HSED: Citizenship/Civics, Employability Skills, Health, Mathematics, Science, Social Studies, and Reasoning Through Language Arts.

### **HIGH SCHOOL EQUIVALENCY DIPLOMA TESTING**

HSED testing assesses for Employability Skills, such as skills in job seeking, applying for work, retaining a job, and self-development and awareness skills. Required training in this area may be waived based on employment experience. Additional completion of computer-based GED tests in Mathematics, Science, Social Studies, Civics, and Reasoning Through Language Arts is also a component of HSED testing. Successful completion is defined as a minimum score of 145 on each test, with a minimum total score of 580 on all four tests combined. Passing of a Health exam or class is also required. Tests can be retaken after evidence is presented that additional preparation has been made.

Upon completion, students receive a Wisconsin High School Equivalency Diploma issued by the Wisconsin Department of Public Instruction.

Upon completion of Mathematics, Science, Social Studies, Reasoning Through Language Arts, and Citizenship/Civics, students will be awarded a General Education Diploma (GED).

### **5.09/COMPETENCY-BASED EDUCATION (CBE)**

The 5.09/CBE Program is designed in coordination with DPI Standards specifically for persons in our care who demonstrate sound, strong learning credentials but cannot translate or apply those skills on standardized GED testing formats. Students must have at least a NRS level 4 or show significant growth in Reading and Math TABE scores before earning this diploma.

### **CAREER TECHNICAL EDUCATION (CTE) PROGRAMS AND COURSES**

Career Technical Education and training is available at most facilities that have on-site education services. All Career Technical Education classes that are offered are affiliated with and accredited by the Wisconsin Technical College System. Some are short-term classes that provide basic skills in a variety of occupations. Students completing these accredited programs receive certificates, Career Technical Education diplomas, or credit toward a 2-year associate degree. Students involved in CTE programs are enrolled in college classes that are equivalent to classes offered outside the DOC. Teachers are accredited in the same way as College Instructors. Career Technical Education training is provided in approximately 20 different

occupational areas with changes frequently based on instructor availability and space. It is possible in many cases to start a Career Technical Education program at one institution and continue or complete it at another institution. Students are encouraged to concentrate in one occupational area to attain work-related job skills that may be used while incarcerated and after release.

### **CAREER TECHNICAL EDUCATION (CTE) RELATED COURSE WORK**

All Wisconsin Technical College System (WTCS) certified programs require some related course work. Requirements vary depending on the program. Related course work can include communications, human/job relations, math, occupational success and strategies, student success and small business development.

These courses are different from general education courses. They are designed specifically to accompany Career Technical Education courses and credit is awarded for successful completion.

Non-credit Career Technical Education related classes are also offered at some sites as well as refresher courses to prepare for CTE programs.

### **CAREER TECHNICAL EDUCATION (CTE) ACADEMIES**

In collaboration with the Wisconsin Technical College System (WTCS), persons in our care are provided with accelerated, academy-style CTE training opportunities for both men and women in several DAI facilities. New program opportunities vary and are based on local job markets, area technical college program offerings, and available resources at the DAI center or institution. Academies have included program areas in Construction Fundamentals, Industrial Maintenance, Gas Metal Arc Welding, Computer Numerical Control (CNC) Operator, and Mechanical Maintenance. Persons in our Care that are interested can contact their social worker or designated staff to see if they meet the eligibility criteria for participation in the program.

### **COLLEGE PROGRAMS**

Correspondence courses for college credit are offered through several University of Wisconsin campuses. Persons in our Care are responsible for tuition costs and costs for books.

### **HIGHER ED IN PRISON PROGRAMS (HEP)**

In partnership with several Wisconsin Technical Colleges, Universities, and private colleges, the DOC offers credit bearing courses at the Bachelor's and Associates levels. The programs are offered under the terms of agreements with the Department to provide Associates Degrees, Technical Diploma's and BA level courses. These are generally funded via grants to the individual (Pell, GI Bill, WI Higher Ed grants, etc.), grants to the college, or via philanthropic funding to the college partners. In partnership with participating Wisconsin Universities and Technical Colleges, the Second Chance Pell Program is offered at DAI institutions and centers based on the site's available resources.

### **TABE TESTING**

The TABE (Test of Adult Basic Education) is an achievement test that measures academic skill levels. All persons in our care enrolled in school at

maximum and medium security institutions, either Career Technical Education or academic, are required to retest with the TABE Full Battery. The TABE will identify strengths and weaknesses and can be used to produce an education plan for each individual.

TABE testing is considered a required condition of school participation. TABE results are an important part of the placement process for educational services. It is imperative that individuals give their personal best effort on the TABE examination so that they may be placed in the appropriate levels of education to meet their needs to find success. TABE results are reported in units called NRS. NRS stands for National Readiness Score from Level 1 through Level 6. The scales outlined include the following:

NRS 1	Beginning ABE literacy
NRS 2	Beginning Basic Education
NRS 3	Low/Intermediate Basic Education
NRS 4	High/Intermediate Basic Education (RLA)/Middle Intermediate Basic Education (MA)
NRS 5	Low Adult Secondary (RLA)/High Intermediate Basic Education (MA)
NRS 6	High Adult Secondary (RLA)/Adult Secondary Education (MA)

### **TITLE 1**

Title 1 is a program for students age 21 and under who are working in an Adult Basic Education class and need extra assistance in their studies. This program serves as a supplement, or addition, to the normal school program.

### **SPECIAL EDUCATION (SPED)**

This program is designed for students, age 21 and under, who have a disability that interferes with their education. Adaptations to the regular classroom instruction, resource room opportunities, or placement in a special class for one or more hours per day, are ways this program assists with the qualified students in achieving high school grades.

### **ENGLISH AS A SECOND LANGUAGE (ESL)**

Many of our institutions offer varying types of opportunities for non-English speaking persons in our care to improve their English comprehension, reading, and writing skills.

### **WISCONSIN INSTITUTIONS LITERACY COUNCIL**

This project offers tutoring to persons in our care in subject areas where they need assistance. Peer tutors (qualified applicants) are trained in PLATT basic literacy tutoring techniques to assist students become independent readers, writers, and speakers in English. Peer tutors are hired to a paid position within the institution.

---

## **LIBRARY SERVICES**

---

Each DOC institution has a library whose services include a general collection, and a legal collection. Some institutions offer interlibrary loan services.

### **GENERAL COLLECTION**

The general collection includes fiction and non-fiction books, reference materials, newspapers, magazines, and audio-visual materials. Some Spanish language and large print materials are also available.

### **INTERLIBRARY LOAN SERVICE**

For those institutions that offer this service, persons in our care may use the interlibrary loan system to obtain materials that are not part of the institution's library collection. Interlibrary loan requests are screened to determine if the materials are in compliance with the institution's policies.

### **LEGAL COLLECTION**

The Electronic Inmate Law Library System (EILLS) is provided to persons in our care via the OTIS Law Library Network, and provides numerous, current legal resources.

Library staff will assist persons in our care unfamiliar with legal materials. Law library clerks also provide assistance in some institutions. Law library services are extended to persons in our care in restrictive housing status. DOC staff and library clerks are neither able to, nor allowed to provide legal advice. Persons in our care may correspond with private attorneys and the courts on legal matters. Photocopy and notary services are provided by the librarian or by other designated staff within each institution.

---

## **RELIGIOUS ACCOMMODATIONS**

---

The Department recognizes that religious or spiritual beliefs and practices can positively impact PIOC rehabilitation and motivation to successfully reintegrate into the community. Each facility applies principles of religious pluralism to address all creeds/faiths/religions in a comparable and fair manner. PIOC can practice according to their personal sincerely held religious beliefs and consistent with the DAI policies cited below. A variety of congregate programming and individual practice opportunities may be available at each facility, depending upon PIOC population interests, volunteers, and donated resources.

DAI policies use Umbrella Religion Groups (URGs) as an administrative tool for structuring programming and accommodations within: Buddhist/Other Asian, Catholic, Humanist/Atheist/Agnostic, Islam, Judaism, Native American/American Indian, Pagan, and Protestant/other Christian URGs. The URGs are not intended to restrict PIOC from carrying out distinctive beliefs and practices. Rather, religious traditions with similar practices are grouped

by URG to inclusively and efficiently offer programming, property and dietary accommodations to as many adherents as possible.

Individuals wishing to participate in congregate worship services or study groups identify which URG will most closely match their spiritual beliefs and practices by completing a Religious Preference form (WICS electronic or paper DOC-1090). PIOC may supplement and complement available URG programming with religious practices carried out independently, such as personal observances and study, meditation, prayer, use of religious publications and personal property items, work proscriptio, written correspondence with fellow believers, and dietary accommodations. Pastoral visits may be arranged upon request to offer individual spiritual care.

All DOC facilities depend upon community volunteers and donated materials to carry out religious accommodations. Larger institutions have one or more Chaplains who coordinate religious activities, recruit and train volunteers, and address spiritual needs of the population. Smaller correctional centers have a designated staff member responsible for these duties. Many facilities have a chapel library or other resources available for use.

Refer to DAI policies for further information:

- 309.61.01 – Religious Beliefs and Practices
- 309.61.02 – Religious Property
- 309.61.03 – Religious Diets
- 309.06.03 – Non-DOC Personnel, Business & Professional Visitors

---

## **BUREAU OF CORRECTIONAL ENTERPRISES**

---

The purpose of the Bureau of Correctional Enterprises (BCE) is to enhance public safety by providing jobs and training to persons in our care to develop marketable skills and experiences in financially viable businesses while producing quality products and services for BCE customers. The four components to BCE are agriculture, industries, logistics and transition.

BCE agriculture operations exist at two farms and a dairy. BCE's 10 industries and its Product Development Center operate within 9 correctional institutions. BCE's logistics operations include two warehouses and a fleet of trucks. BCE's Transition Program is based in the bureau's central office in Madison and works state-wide to provide services to BCE workers who choose to participate and employers looking to hire great additions to their business teams. Bureau employees train and guide a workday average of 366 persons in our care to work in agriculture, industries, and logistics operations. BCE contributes to the Department more fully meeting its mission by providing opportunities for persons in our care to work, learn and earn. These are opportunities workers may use to better prepare themselves to succeed while in department care and when they return to their families and communities.

BCE workers contribute to institution safety. Participants must not have had any major rule violations for 12 months before they can apply for a BCE job and they must remain free of major violations to keep a BCE job. Those requirements, along with the time and energy workers spend on the job, reduce the number and likelihood of dangerous behaviors by BCE workers.

BCE workers invest in learning. Participants must have earned or be enrolled and actively pursuing a high school diploma or GED/HSED before they will be hired for a BCE job. Workers learn general work skills like getting to work each day, getting through the workday in spite of challenges with equipment and people, and being productive by getting work done. Workers learn technical work skills, including but not limited to: fork lift operations; wood fabrication; commercial sewing; computer-aided drafting and design; inventory management; and livestock management. BCE workers are strong job applicants capable of quickly becoming valuable employees. Wisconsin employers want to hire and keep them on their teams. BCE work environments mirror, as closely as possible, those in the private sector. Production materials, techniques, costing, and quality control are part of the training and experiences workers receive during their employment with BCE. The Bureau often works in partnership with institutional vocational training programs to enhance work skills development for persons in our care and partners with the Department of Workforce Development to provide certified apprenticeship training programs.

BCE workers earn money used to pay financial obligations and build financial stability. Workers' earnings are used to make court ordered payments, such as restitution to victims of their crimes and child support to their dependent children. Earnings are also deposited into the worker's release account so s/he has funds upon release. Those funds add stability and reduce the likelihood of returning to DOC custody.

BCE's Transition Program employees assist current and former workers in their work to earn jobs. Workers receive help preparing a resume and information to help them prepare for job interviews. Program employees search for and supply leads on vacant jobs that are near the worker's approved release address and relate as closely as possible to his/her educational level and work experiences and interests. The Program may also fund the purchase of specific tools and/or clothes needed to accept a job a worker has been offered. The Transition Program is the culmination of the person's BCE experiences. A 2024 analysis by the Department's Research and Policy Unit indicates former BCE workers have an 88% employment rate and a 78% success rate not returning to DOC custody in the Department's three-year follow-up period.

---

## **REENTRY SERVICES**

---

Institutions/Centers, irrespective of custody level, facilitate release planning for all persons in our care starting approximately 6-9 months prior to release. At this time, individuals who will have served at least one year in prison by the time of release and will be releasing to Wisconsin supervision, will

complete a COMPAS-R Core Assessment with their social worker/treatment specialist. Around this same time, all individuals releasing to supervision will be provided a Release Plan Information Form (DOC-0745) to complete which will provide information regarding their residence plans, employment plans, and education/treatment plans upon release. This document will also allow the individual to share information regarding financial and health concerns, transportation and clothing needs, and whether assistance obtaining vital documents is needed. Using the DOC-0745, the social worker/treatment specialist works with the individual on making referrals to appropriate outside agencies regarding health care needs (i.e. Social Security Benefits, health insurance), helping to secure transportation and clothing needs, and obtaining appropriate vital documents. The DOC-0745 is shared with the individual's probation and parole agent allowing both DAI and the Division of Community Corrections to work collaboratively with the individual on a successful reentry plan. Several phone calls occur between the individual and his/her agent, with assistance from the social worker/treatment specialist. This allows the person in our care an opportunity to ask questions about his/her supervision, discuss concerns regarding their release plans, review rules with their agent, and receive updates from their agent regarding residence approval and programming recommendations. Other documents that may be signed during the release planning process include: Rules of Supervision, Voter Ineligibility Notice and Acknowledgement, and Authorization for Disclosure of Non-Health and/or Protected Health Information.

Individuals Maximum Discharging from their sentence, with no remaining supervision, are not required to complete a COMPAS- R Core Assessment or a DOC-0745. However, they will work with their social worker/treatment specialist on obtaining housing resources (if needed), having referrals made to appropriate outside agencies regarding health care needs (i.e. Social Security Benefits, health insurance), helping to secure transportation and clothing needs, and obtaining appropriate vital documents.

### **OPENING AVENUES TO REENTRY SUCCESS (OARS)**

Opening Avenues to Reentry Success (OARS) supports the prison-to-community transition of individuals living with a serious and persistent mental illness who are medium-to-high-risk of reoffending. The program is a collaborative effort of the Department of Corrections and the Department of Health Services.

OARS uses a team approach to provide participants the stability and skills necessary to live successfully in the community. This includes connecting the participant with locally-based supports for health care, housing, education, employment, and transportation. Each participant's support is different depending on their individual needs.

Participants complete the program when they demonstrate the ability to maintain their mental health and basic needs without the assistance of their program team. Depending on their needs, participants may receive services for six months up to two years in the community.

### **REENTRY LEGAL SERVICES (RLS)**

Reentry Legal Services (RLS) provides civil legal services to disabled and mentally ill individuals. Eligible individuals at participating facilities can retain a public benefits attorney or paralegal who will assist with public benefits applications including Supplemental Security Income (SSI), Social Security Disability Insurance (SSDI), and Medicaid. RLS staff will follow an individual's case into the community after release from prison and will continue to advocate for benefits until appeals are exhausted or benefits are achieved.

### **INFORMATION RESOURCES FOR PIOC**

Informational Resources on MyDOC are printable resources, which can be given to PIOC at any point during their incarceration as part of case planning, including during the release planning process. These self-guided resources provide information to help PIOC better navigate every day experiences and successfully reintegrate into the community.

Topics include: education, employment, family support, financial literacy, health, housing, relationships, and transportation.

---

## **DAI SERVICES BY SITE**

---

### **Chippewa Valley Correctional Treatment Facility (CVCTF)**

**Chippewa Falls, Wisconsin**

**Christine Suter, Warden**

#### **Primary Treatment Services**

Anger Management

Cognitive Behavioral Interventions- Employment Adult (CBI-EA)

Earned Release Program (ERP)

- Substance Use Disorder (SUD) Level 2, 3, 4
- Thinking for a Change
